Applicant appreciates the Examiner's indication that claims 22-31 are allowed.

**The Claimed Invention**

An exemplary embodiment of the present invention, as recited by, for example, independent claim 14, is directed to a linear drive device that includes an excitation winding producing a variable magnetic field, a magnetic-flux-guiding main yoke body accommodating the excitation winding and having multiple limbs including a central limb, a winding-free counter-yoke body disposed opposite to the main yoke body, an axial gap formed between the main yoke body and the counter-yoke body, and an
